

APSS Mantaray Dive Fins

Dual-Directional Water Channeling System

Features and Advantages

- High-Tech Dual Water Channeling System
- Superb Tight Turning Ability
- Shorter, Lighter, Faster
- Great Travel Fin
- Ease of Kick
- Durable
- Low Silting
- Incredible Power
- Total Kick and Diving Versatility
- Excellent Control on Reefs and Wrecks
- Eliminates Buckle Problems

(1) Fin Strap is easy to adjust, reliable, eliminates buckle problems and drag and changes out in seconds.

(2) Footpocket is designed for comfort, efficient energy transfer to the blade and fin stability.

(3) Scoop and (4) Gill Channels work together to focus thrust, reduce resistance and stabilize the fin blade.

(5) Side Wings add blade surface on the down stroke and are angled to reduce resistance on the upstroke and improve blade stabilization.

SCUBA LAB 2005 FIN REVIEW "TESTERS CHOICE"

UNIVERSAL DIVE FIN STRAP

The Universal Dive Fin Strap

Simply remove your old fin straps and buckles to expose the fin buckle posts on the sides of the fins foot pockets. Pick a slot in the strap and slide it over the post. With the large easy to grab pull tab, you slip the strap up on your heel and, just like that, you're ready to resume your dive.

Extensive research, testing, and consulting divers of varying backgrounds went into the design of the Mantaray dive fins.

(1) Fin Strap is easy to adjust, reliable, eliminates buckle problems and drag, and changes out in seconds.

(2) Footpocket is designed for comfort, efficient energy transfer to the blade and fin stability.

(3) Scoop and (4) Gill Channels work together to focus thrust, reduce resistance, and stabilize the fin blade.

(5) Side Wings add blade surface on the down stroke and are angled to reduce resistance on the upstroke and improve blade stabilization.
