

Nick N., U.S. Navy Seal

“I have evaluated a wide variety of fin types, of all the fins I have used none have provided me with the performance equal to the Mantaray Dive Fins.”

Mark S. Brown, La Jolla Cove Lifeguard

“In my recommendation of the Mantaray Dive Fins, I was very impressed with the fins thrust, power, without nearly as much effort.”

Steve Douglas, Underwater Video Photographer

“The Mantaray Dive Fins are very lightweight... I found the foot pocket to be the most comfortable I have ever used, allowing me to get closer without kicking up the bottom and obscuring the filming.”

Matt Karl, Huntington Beach Life Guard & Dive Rescue Team

“The Mantaray Dive Fins worked great. Despite being shorter, they still provided good thrust with a comfortable flex pattern which is much more forgiving on beach entries and large search patterns.”

Jeremiah B., U.S. Coast Guard

“I had the opportunity to try the Mantaray Dive Fins. The word that came to mind was ‘effortless’ giving me the propulsion I needed while consuming less energy. I now use the Mantaray for both military and recreational dives.”

Joel M., U.S. Navy Seal Team Three

“I was wearing Twin 80s, I was quite impressed by the Mantaray Dive Fins they were very mobile with excellent thrust. I highly recommend the opportunity to anyone who is an avid diver or surface swimmer to examine these fins.”

Kathleen Stogsdall, Owner, IB Divers NAUI Training Facility

“The Mantaray Dive Fins bring innovated design features. The diver gets a high thrust and efficient kick with minimum stress. There is no cramping of the leg or calf muscles. The weight and length of the Mantaray dive fins make it low impact and environmentally friendly.”

Stephanie Truhler, Member San Diego Council of Divers

“I found that the Mantaray Dive Fins were very easy to put on in the surf, they gave a lot of power both on the surface and below the water. I am now able to use a variety of different kicks to minimize sitting because the fins are so adaptable. This is an amazing fin, especially for the price. I’ve been very happy with them!”

Drew Gold, PADI Instructor and Dive Master

“Lightweight and easy to pack. I used the Mantaray Dive Fins in a strong current and they performed admirably. Your fins really turned heads.”
