Oxygen Safe Lubricants for the Scuba Industry

As a pioneer in the field of specialized synthetic lubricant formulation, Aerospace Lubricants, Inc., has been meeting the demands of severe defense, automotive OEMs and space operations since 1973.

The Aerospace Lubricants product lines are sold worldwide. Our team of technicians and staff members are here to help solve complex lubrication problems by recommending or, in some cases, developing new products to meet your specific requirements.

As a company who is not satisfied with status quo, we are driven to continually advance the science of high performance synthetic lubricants. From our ever expanding technological base, our company has gained the reputation as a leader in the field of tribology. We are *the company* to come to when confronted with lubrication requirements too demanding for conventional lubricants.

Aerospace Lubricants, Inc., is committed to developing the highest quality of products.

Since our inception, we have been dedicated to putting the right people, processes and best practices in place to ensure that you get superior value, as well as outstanding performance from all of the Tribolube® products.

MILSPEC grades of Tribolube® products are tested at an outside, independent lab to guarantee each batch meets or exceeds the appropriate military specifications MIL-PRF-27617.

The "New" Preferred Lubricant for oxygen-safe scuba diving applications

Oxygen Safe Lubricants

With over 35 years of cutting-edge science, Aerospace Lubricants is proud to offer their latest Tribolube® line of products that is furthering the sport of scuba diving. Unlike competitive products, the Tribolube® line of products offer superior extreme pressure and anti-wear properties extending equipment life by dramatically reducing corrosion and sticky, residue buildup.

With breakthrough science and technology, Tribolube's® revolutionary formulas make underwater breathing easy, no matter what the climate. Innovative packaging allows for a more accurate application, making Tribolube® products easier to use than the competitive brands.

The Tribolube® line of O₂ safe lubricants are compatible with all o-rings and materials used in the scuba industry — leading the way to safer, easier and more enjoyable scuba diving experiences.

"Leave your worries on the land!"

Tribolube® 71 is specifically designed for Nitrox open and closed circuit diving systems and is LOX/GOX compatible. Tribolube® lubricants let you dive with confidence and peace of mind.

Tribolube® products are:

- Chemically and biologically inert
- Thermally stable
- Non-flammable
- Non-auto ignitable
- Developed to exceed the performance requirements of MIL-PRF-27617

The "Total" Package Lubricants • Cleaners • Protectorants

Available in a variety of sizes, our lubricants are non-toxic and oxygen-compatible.

Tribolube® 71 is designed for open and closed circuit diving systems. Tribolube® 66 is designed for open circuit diving systems only.

Tribolube® KO₂ solvent cleaner is designed for the removal of PFPE lubricants used in open and closed circuit diving systems. This solvent should be used in conjunction with your standard oxygen cleaning system process.

Tribolube® EPO₂ protectorant is non-toxic; formulated to protect brass and other metals; and LOX/GOX compatible.

Tribolube® HSP is a non-toxic silicone aerosol formulated for marine applications and can be used for the following: zippers, wet suits, dive gear, spear guns, rubber products, general lubrication. *NOTE: Contains petroleum and silicone compounds. Not for use in oxygen service as it may cause fire or explosion.*
