Concerning recall of SI TECH LP Drysuit inflation hoses batch VIE thru ZCT

Form Customer LP hose Insert removal 090416.doc Issue 090416

UPDATED FORM 090416

RECALL for REMOVAL of the Flow Restriction Insert in hoses produced September 2006 thru March 2009 (Batch VIE thru ZCT, please see detailed list on www.sitech.se of all batches that are subject for removal).

DO NOT dive with a hose subject to this recall until the insert has been removed by knowledgeable personnel.

INSERT REMOVAL can be done at your point of purchase, or by a Check Point designated by SI TECH AB or the manufacturer of your drysuit (if you have obtained the hose together with your new drysuit). All other service (*and costs for such service*) but for insert removal is beyond SI TECH AB's responsibility.

In those cases where a flow restricting insert is not found in place, SI TECH must have a full report (please use this form). DO NOT use the equipment until you have been contacted by SI TECH or its agent..

Information to be filled in by USER

1. Have you removed the insert yourself? Yes No

2. Has the hose been connected to anything else but a regulator 1st Stage? Yes No

Fill in all equipment to which the SI TECH LP hose has been connected to in the form below.
